SUCCESS GUIDELINES

Nakhoul Corporation is adopting the latest technologies and preparing the program for scaling up. Delivery is the bottle neck of Nakhoul Corporation, and logistics play a significant role, starting from the people working on the order system and reaching the delivery service, and after the sale. Auditing and organizational Human Development is the one of the main strategy adopted by Nakhoul Corporation “360° SMART FACTORY program” Said Aline Nakhoul . Listening to the clients and understanding their requests, working on producing the best quality at utmost delivery time. The technology used of new and updated machines and tools, new website platform user-friendly, new flyer and catalogs, training and acquiring new skilled candidates is extremely important.
